We have reached a decision regarding your submission to JOURNAL OF INFORMATICS AND TELECOMMUNICATION ENGINEERING, "Design and Development an e-Lapor Application to Support Public Complaint Services in Tunjungtirto Village".

Our decision is: Revisions Required by due date 28 June 2023

Editor:

1. Abstrak harus terdiri dari Masalah, Tujuan, Metode, Hasil, Kesimpulan, dan Implikasi.(150-200 kata)
2. Dalam pendahuluan, Anda harus memenuhi poin-poin berikut: mengklaim dengan pasti, membuat generalisasi topik, meninjau item penelitian sebelumnya, menunjukkan kesenjangan, mengajukan pertanyaan, mengemukakan temuan utama

3. Pada Metode penelitian informasi yang disajikan pada poin A, B, C dan D terlalu minim, silahkan diperkaya informasi atau digabungkan tanpa poin-poin
4. anda telah menyajikan hasil akan tetapi belum menyajikan pembahasan. Pada bagian hasil dan pembahasan Anda harus memberikan bagian: apa saja batasan dari karya ini, minimal satu paragraf atau lebih. Selanjutnya, tinjau temuan Anda dan bandingkan dengan temuan sebelumnya. maka Anda dapat memberikan kontribusi dan implikasinya di paragraf terakhir.

5. tolong tambahkan evaluasi hasil seperti : kebermanfaat, Desain Interface, Pengoperasian dll
6. daftar pustaka tambahkan setidaknya minimal 25 referensi dalam waktu 5 tahun terakhir

7. pastikan semua tinjauan baik dari editor maupun reviewer sudah terpenuhi
8. **tolong highlight setiap revisi, merah untuk reviewer A, kuning untuk reviewer B, dan hijau untuk editor**

Reviewer A:
Recommendation: Revisions Required

Comment on the TITLE (it should consist of: the METHOD, AIMS, and OBJECTS)

judul sudah sesuai

Comment on ABSTRACT (It should consist of Problem, Aims, Method, Results, Conclusion, and Implication)

abstrak blum sesuai denngan masalah, metode dan hasil, sehingga perlu perbaikan mayor.

Comments on INTRODUCTION (It should be consist of: background knowledge, state of the art method, research gap, AIMS, and proposed method)

diperlukan dilakukan pentelaahn kembali masalah peneltian dan perlu tambahkan dengan referensi terbaru. tujuan belum menggambarkan suatu penelitian. tujuan penelitian tidak hanya membngun sistem. sehingga pada bagian ini perlu perbaikan mayor

Comments on MATERIALS and METHOD (it should consist of: Architecture research, dataset, data collection & measurement, and data analysis)

Belum menggambarkan metodologi sebuah penelitian.

Comments on RESULTS (it should consist of: the main finding in Table or Graphics, results should not a raw data)

masih seperti hasil tugas akhir sehingga perlu diperbaiki

Comment on DISCUSSION (It should consist of interpretation of the result, comparison with other studies, the limitation of the study, and implication)

belum ada

Comments on CONCLUSION (it should consist of: restate the AIMS, main findings, and future works)

belum menjawab tujuan

Comments on REFERENCES (it should be up to date, less self citation (10%), completeness of the references)

ok

Other comments (a. are the figure and table already cited in the text?, b. are the English language adequate?, c. are the article structure well manage?)

sudah jelas

The overall SCORE for this article (0-100)

35

Reviewer B:
Recommendation: Revisions Required

Comment on the TITLE (it should consist of: the METHOD, AIMS, and OBJECTS)

The title of the section already matches the rules of a proper title. In the title of this article, it has described the research method, the purpose of the research, the intended object, as well as the specificity of the science that is supported by an author.

Comment on ABSTRACT (It should consist of Problem, Aims, Method, Results, Conclusion, and Implication)

In the abstract section of the present article, it meets the criteria as a good abstract. The abstract lists the problems faced by the community, the purpose of this research, and the contribution that the results of this research can make to the community. The method presented in the abstract is also clearly explained, together with the results achieved. Findings of the research results and implications of the research.

Comments on INTRODUCTION (It should be consist of: background knowledge, state of the art method, research gap, AIMS, and proposed method)

In the Introduction section, the author has not fully followed the rules in the Preface writing. In the introduction to this article, there is a general background that the author is interested in conducting this research. Researchers have not attached research results from other researchers that describe previous studies that have been carried out, so there is no statement of gaps in the form of weaknesses and limitations from previous research.
The object of research is also written in this Introduction section. Likewise, the implications of the recommendations and benefits of the research for the wider community have been included in the Introduction section.

Comments on MATERIALS and METHOD (it should consist of: Architecture research, dataset, data collection & measurement, and data analysis)

In the Introduction section, the author has not fully followed the rules in the Preface writing. In the introduction to this article, there is a general background that the author is interested in conducting this research. Researchers have not attached research results from other researchers that describe previous studies that have been carried out, so there is no statement of gaps in the form of weaknesses and limitations from previous research.

The object of research is also written in this Introduction section. Likewise, the implications of the recommendations and benefits of the research for the wider community have been included in the Introduction section.

Comments on RESULTS (it should consist of: the main finding in Table or Graphics, results should not a raw data)

In the Introduction section, the author has not fully followed the rules in the Preface writing. In the introduction to this article, there is a general background that the author is interested in conducting this research. Researchers have not attached research results from other researchers that describe previous studies that have been carried out, so there is no statement of gaps in the form of weaknesses and limitations from previous research.

The object of research is also written in this Introduction section. Likewise, the implications of the recommendations and benefits of the research for the wider community have been included in the Introduction section.

Comment on DISCUSSION (It should consist of interpretation of the result, comparison with other studies, the limitation of the study, and implication)

In the Discussion section, the author has explained the results of the Hybrid Power Calculation as well as explained the results of the table previously written. There are some weaknesses from the results of his research, however
there is no explanation regarding the comparison of the results of this study with other research / studies / previous, so that progress can not be assessed from previous research.

Comments on CONCLUSION (it should consist of: restate the AIMS, main findings, and future works)

At the conclusion, the author is very good at writing down the contents that must be met.
The author has included answers to the objectives of this research.
However, the recommendations/suggestions for further research have not yet been written.

Comments on REFERENCES (it should be up to date, less self citation (10%), completeness of the references)

Good

Other comments (a. are the figure and table already cited in the text?, b. are the English language adequate?, c. are the article structure well manage?)

Check the writing again according to the template

The overall SCORE for this article (0-100)

78
